Microwave photonics technologies supporting high capacity and flexible wireless communications systems - DTU Orbit (08/11/2017)

Microwave photonics technologies supporting high capacity and flexible wireless communications systems

Emerging 5G wireless systems require technologies for increased capacity, guarantee robustness, low latency and flexibility. We review a number of approaches to provide the above based on microwave photonics and hybrid optical fiber-wireless communication techniques.

General information

State: Published
Organisations: Department of Photonics Engineering, Metro-Access and Short Range Systems
Authors: Lu, X. (Intern), Tatarczak, A. (Intern), Rommel, S. (Intern), Rodríguez Páez, J. S. (Intern), Vegas Olmos, J. J. (Intern), Tafur Monroy, I. (Intern)
Number of pages: 2
Publication date: 2015

Host publication information

Title of host publication: Asia Communications and Photonics Conference 2015
Publisher: Optical Society of America
ISBN (Print): 978-1-943580-06-4
Main Research Area: Technical/natural sciences
Conference: Asia Communications and Photonics Conference 2015, Hong Kong, Hong Kong, 19/11/2015 - 19/11/2015
DOIs:

10.1364/ACPC.2015.ASu1J.5

Bibliographical note

From the session: Radio over Fiber I (ASu1J)
Source: PublicationPreSubmission
Source-ID: 116493740
Publication: Research - peer-review › Article in proceedings – Annual report year: 2015
